Professional Summary

Experienced Android Mobile Developer with 3+ years of expertise in building high-quality, user-centric mobile applications. Proficient in Kotlin and Jetpack Compose with a strong focus on modern Android development practices. Proven track record of delivering scalable and maintainable applications while collaborating effectively with cross-functional teams.

Technical Skills

Programming Languages: Kotlin, Java

Mobile Development: Android SDK, Jetpack Compose, XML Layouts, Material Design

Architecture & Patterns: MVVM, MVI, Clean Architecture, Repository Pattern

Jetpack Libraries: Compose, Navigation, ViewModel, LiveData, Room, DataStore, WorkManager, Hilt/Dagger

Networking: Retrofit, OkHttp, REST APIs, GraphQL

Asynchronous Programming: Kotlin Coroutines, Flow, RxJava

Testing: JUnit, Mockito, Espresso, Compose UI Testing

Tools & Technologies: Android Studio, Git, Gradle, Firebase, CI/CD, Figma

Other: SOLID Principles, Agile/Scrum, Code Review, Performance Optimization

Professional Experience

Senior Android Developer

Tech Solutions Inc.

Jan 2023 – Present

San Francisco, CA

- Led the migration of legacy XML-based UI to modern Jetpack Compose, improving development velocity by 40% and reducing UI-related bugs by 30%.
- Architected and developed a real-time messaging feature using Kotlin Coroutines and Flow, serving over 100K active users with 99.9% uptime.
- Implemented MVVM architecture with Clean Architecture principles, resulting in 50% improvement in code maintainability and testability.
- Integrated Firebase Analytics and Crashlytics to monitor app performance, reducing crash rate from 2.5% to 0.3%.
- Mentored 2 junior developers on Kotlin best practices and Jetpack Compose development patterns.

Android Developer

Mobile Innovations Ltd.

Jun 2021 – Dec 2022

New York, NY

- Developed and maintained 3 production Android applications using Kotlin, serving a combined user base of 200K+ users.
- Implemented offline-first architecture using Room database and DataStore, improving app reliability in low-connectivity scenarios.
- Optimized app performance by identifying and resolving memory leaks, reducing ANR rate by 60%.
- Collaborated with UI/UX designers to implement pixel-perfect Material Design interfaces, achieving 4.5+ star rating on Google Play Store.
- Integrated RESTful APIs using Retrofit and implemented proper error handling and retry mechanisms.

Key Projects

FinanceTracker Pro – Personal finance management app built with Jetpack Compose

- Developed fully in Jetpack Compose with Material 3 Design, featuring dynamic theming and animations.
- Implemented local data persistence with Room and encrypted SharedPreferences for sensitive information.
- Created custom charts and visualizations using Compose Canvas API for expense tracking.

FitLife Health – Fitness tracking application with real-time workout monitoring

- Integrated Google Fit API and Health Connect for comprehensive health data aggregation.
- Implemented background location tracking using WorkManager for outdoor activity tracking.
- Built custom UI components in Jetpack Compose for workout timers and progress indicators.

Social Connect – Social networking app with real-time chat functionality

- Developed real-time messaging using Firebase Realtime Database and Cloud Firestore.
- Implemented image upload and compression using Coil and CameraX libraries.
- Utilized Hilt for dependency injection, ensuring modular and testable codebase.

Education

Bachelor of Technology in Computer Science

Sep 2017 – May 2021

University of Technology

India

- Relevant Coursework: Data Structures, Algorithms, Mobile Computing, Software Engineering
- Final Year Project: Android-based Campus Navigation System using Google Maps API

Certifications & Achievements

Associate Android Developer – Google (2022)

Kotlin for Android Developers – Udacity (2021)

Published 2 open-source Android libraries on GitHub with 500+ combined stars

Speaker at Android Developer Meetup: "Modern Android Development with Jetpack Compose"
